Attachment 1

Ural-Khim-Mash Plant in Sverdlovsk

1. Transformer station.
2. Canteen.
3. Garage and motor vehicle repair shop.
4. Oxygen plant.
5. Northern entrance.
6. Boiler house with one smokestack.
7. Electric plant with drawing rooms on the second floor.
8. Unloading point for railroad tank cars.
9. Storage shed for various materials.
10. Forges 120x50 meters, with two large oil-burning annealing furnaces, some small annealing furnaces, one large steam press, several compressed air hammers, two railroad sidings and two smokestacks.
11. Transformer station, under construction.
12. Lathe shop, about 100 meters long with one smokestack.
13. New workshop about 70x100 meters, no details available.
14. Main entrance.
15. Several-story administration building.
16. A group of workshops, covering a total area of about 120x230 meters and divided as follows:
 - a. Workshop, 60x120 meters, where boilers are adjusted and assembled. The shop has two shop tracks and two traveling cranes.
 - b. Lathe department, about 100 meters long.
 - c. Assembly hall with shop track and numerous metal-working machines; large boilers were assembled here.
 - d. Restricted workshop, about 20x100 meters, strictly guarded. There is an entrance from the assembly hall (c) and one from the administration section (f). Work benches were set up along the wall.
 - e. Small workshop.
 - f. Administration section. The entrance was guarded.
 - g. Compressor station. Five compressors were set up to the south in front of the building.
17. Heating plant with one smokestack.
18. Group of workshops, some of them still under construction:
 - a. Holding shop and foundry equipped with one electric furnace and two coke-burning furnaces, traveling cranes, and shop tracks.
 - b. Workshop under construction, one smokestack.
 - c. Workshop under construction, about 100 meters long.
 - d. Chemical laboratory.
 - e. Transformer station.
19. Concrete plant.
20. Pond for cooling water.
21. Southern entrance.
22. New workshops under construction.
23. Sawmill.
24. Open air storage of pipes, iron rods, and sheet metal.
25. Storage building, under construction. Many chrome-nickel steel plates up to 7 meters long, 3 meters wide, and 5 cm thick were seen there. They had arrived by rail.
26. Pattern shop.
